

VelociToast-Prime™ Owner's Survival Guide

Congratulations, Survivor.

You are now the proud handler of a VelociToast-Prime™ — the world's first predatory breakfast companion. Please read this manual carefully. Failure to do so may result in injury, missing toast, or catastrophic levels of awesome.

IMPORTANT SAFEGUARDS

Because this is not just a toaster — it's a *dinosaur* that eats bread.

1. Do not insert hands, heads, or small pets into the VelociToast-Prime™. It is calibrated for bread, bagels, and the occasional Pop-Tart® only.
 2. Unit roars when ready. This is normal. Do not attempt to roar back — you will lose.
 3. Children should be supervised at all times. VelociToast-Prime™ may attempt to "hunt" unattended chicken nuggets.
 4. Do not attempt to butter bread *before* toasting. VelociToast-Prime™ hates weakness.
 5. Never use outdoors unless you want to startle the neighbors or establish neighborhood dominance.
 6. Do not use gasoline, lighter fluid, or other accelerants to "speed up" the toasting process. The Predator Precision Browning™ system is already optimized.
 7. Do not cover unit with drapes, tarps, or mosquito nets. VelociToast-Prime™ becomes claustrophobic and violent.
 8. Oversized bread or anything shaped like Jeff Goldblum may cause excessive excitement.
 9. The "hunt" feature is mostly theatrical. *Mostly*.
-

PARTS IDENTIFICATION

1. **Snapping Jaw Slot** – Where you insert bread slices. Do not insert your Tinder dates' phone numbers.
 2. **LED Raptor Eyes** – Glow red while heating, blink amber during hunt mode, and turn green when toast is ready.
 3. **Predator Precision Browning™ Dial** – Adjusts shade from "lightly singed" to "apocalyptic char."
 4. **Clever Girl™ Indicator Light** – Illuminates when optimal crispiness is achieved.
 5. **Toast Drawer of Destiny** – Collects the finished sacrifice.
 6. **Roar Vent** – Emits terrifying steam clouds during operation.
 7. **Animatronic Servo Head** – Provides unsettling lifelike movement.
-

OPERATION INSTRUCTIONS

1. Place VelociToast-Prime™ on a stable surface. Kitchen counters are ideal. Coffee tables, car dashboards, or hospital waiting rooms are *not*.
2. Plug into properly grounded outlet. If the outlet screams, call an electrician.

3. Load bread horizontally into the Snapping Jaw Slot.
 4. Adjust Predator Precision Browning™ Dial to desired crispiness. For beginners, we recommend Level 3: *Mild Terror*.
 5. Press the ON switch. VelociToast-Prime™ will hiss, growl, and lock onto your bread.
 6. Stand back. Allow the raptor to do its work. Interference may void warranty *and* your limbs.
 7. When complete, VelociToast-Prime™ will roar triumphantly and deliver your toast to the Drawer of Destiny.
 8. Garnish with jam, butter, or fear.
-

STANDBY FUNCTION

- VelociToast-Prime™ may enter **Stealth Mode** after long inactivity. In this state, eyes dim and unit appears dormant. It is not.
 - To reawaken, press the ON switch. Allow 3-4 minutes for heating coils to reach "predator-ready" temperature.
-

CLEANING INSTRUCTIONS

1. Switch OFF. Wait until Clever Girl™ light is off and the unit has cooled.
 2. Remove the Toast Drawer of Destiny and empty crumbs (do not offer to pets).
 3. Wipe exterior with damp cloth. Do not submerge VelociToast-Prime™ in water unless you wish to re-create *The Day After Tomorrow*.
 4. Do not use abrasive cleaners, unless you want your toaster to look like it survived a meteor strike.
-

WARNING LABELS

- **DANGER:** VelociToast-Prime™ may attempt to assert kitchen dominance. Never show fear.
 - **WARNING:** Do not taunt toaster during operation. It remembers.
 - **CAUTION:** Extended eye contact may result in imprinting. Congratulations, it now thinks you're its mother.
-

WARRANTY

VelociToast-Prime™ comes with a **1-year warranty** against manufacturing defects, bread theft, and minor rampages. Warranty void if: - You ride the toaster like a horse. - You use it to toast fossilized remains. - You feed it gluten-free bread without proper calibration.

VelociToast-Prime™: Evolution Has Never Been This Toasty.
